Abstract of JP2001142666

PROBLEM TO BE SOLVED: To prevent registered font data from being reregistered.
SOLUTION: This printer 30 has a font file 62 in which font data are registered, a font management table 61 in which the attributes of the font data registered in the file 62 are stored and a font managing part 64 which manages access to the file 62. When the part 64 receives a font registration command from a printer host 10, the part 64 refers to the table 61, decides whether or not font data shown by the font registration command are registered in the file 62 and does not register the font data in the file 62 when the font data are registered.
